

Psychiatry & Medication Support

Expert, local care for medication consultation & management from children through adults

~53%
of U.S. adults
with a mental
illness have
not
received
treatment

Around
1 in 5
individuals use
medication to treat
their mental
illness

How can we support you?

Full Spectrum Care

Comprehensive psychiatric evaluation, medication management, and psychotherapy for clients of all ages

Pediatric & Adolescent Expertise

Specialized care for pediatric ASD, ADHD, learning disabilities, and complex developmental or behavioral conditions

Adult & Complex Mental Health

Evidence-based treatment for depression, anxiety, bipolar disorder, schizophrenia, PTSD, and OCD

Trauma-informed & Holistic Care

Integrated care using biopsychosocial and trauma-informed models, emphasizing collaboration and individualized plans

Clinical Leadership & Coordination

Led by board-certified psychiatrists and psychiatric nurse practitioners, our team ensures coordinated, high-quality care across disciplines

Why choose MMHC for your psychiatric care?

Holistic Care

A thorough evaluation prior to any treatment of your whole person: mental, physiological and medical.

Multi-serviced

A evidenced-based opinion on your best course of treatment, be that Psychiatry or another MMHC service

Coordinated

Clinical coordination with any other MMHC service that may support your overall care goals

Supportive

Follow-up support to ensure your mental & physical health during medication management

 We're here to help you get started.
