What We help

How We Help

Who We Help

Initial Profiling

We help develop an understanding of cognitive and emotional abilities, strengths, and weaknesses, and how these relate to real-life strategies for overcoming difficulties and fostering growth, through personalized treatment plans & support recommendations.

- Initial series of psychological evaluations & assessments
- Robust diagnostics that includes personalized recommendations tailored to your needs
- After-assessment appointments to deepen your understanding about how to live with & successfully manage to your treatment plan

We support all ages in understanding current struggles and making accurate diagnoses to create a full picture of areas of need. We provide clear, research-based strategies to help adults, adolescents, children and their parents thrive.

Accommodation

In our evaluations, we ask about your work or school environment and identify areas of strength and difficulty. For our minor clients, we coordinate with educators to understand classroom challenges and provide targeted recommendations.

- Series of psychological evaluations & assessments for cognitive and learning abilities or challenges
- For workplace, a functional capacity evaluation (FCE)
- Disability accommodation letter, if appropriate, and/or 504 plan support to support IEP development, if applicable

We assist those struggling with their workload or school performance. We aim to understand your difficulties and provide targeted strategies and supports, and our evaluations will give you the information to support testing or workplace accommodation, referrals or other treatment support.

Diagnosis Support

We assist individuals in understanding and managing their previous diagnoses. Our goal is to provide clarity and support, helping you navigate your journey with confidence. We offer strategies and resources tailored to your specific needs, ensuring you have the tools to thrive.

- Thorough previous diagnosis review & needs assessment
- Consultation with you on your current or future goals
- Recommendations or additional evaluations to determine other treatment paths, referrals or resources to support your diagnosis

We support individuals of all ages who have received a previous diagnosis and are seeking further guidance. Whether you are looking for additional strategies, validation, or a comprehensive treatment plan outside of initial evaluation, we're here to help you make the most of your strengths and address any challenges.
