

TraumaWise Intensive Outpatient Program (IOP)

Accelerated, skills-based trauma treatment designed to help you stabilize, heal, and move forward.

The TraumaWise IOP at Minnesota Mental Health Clinics is a **structured group therapy** program designed to help individuals **understand how trauma impacts the brain and body** – and learn **practical skills** to build resilience and manage symptoms in daily life.

Participants gain tools that support both day-to-day functioning and deeper trauma processing work, helping **reduce emotional overwhelm while strengthening safety, control, and connection.**

Clients show **measurable improvement across seven core trauma recovery domains.**

Evidence-Based Approach

This program blends trauma recovery science and DBT skill development, grounded in the work of:

- Janina Fisher – Transforming the Living Legacy of Trauma
- Marsha Linehan – DBT IOP curriculum foundations

Participants learn how trauma shapes emotional responses – and how to regulate, reconnect, and rebuild safety.

What to know about the TraumaWise IOP?

In person at the Eagan Clinic
3450 O’Leary Lane, Eagan, MN
Up to **8 participants**
